1. Problems 7, 8 and 9 of Chapter 11 are all helpful (for problem 9, you will subtract government dissaving from private saving to get the aggregate saving rate, s).

2. Problems 4, 6 and 7 are all good problems to review Chapter 12.

3. Work out Problem 8 of Chapter 12 (and read the appendix).

4. Problems 1, 2 and 3 of Chapter 14 are helpful and quick. Problem 6 is good to work out, and Problem 7 is a good study problem.

5. Make sure you can derive the formulas in Section 14.4.

6. Problems 2 and 3 will help you make sure you understand the yield curve. Problems 5, 6 and 7 are good study problems.
