Instructional Computing Services

ITS's Instructional Computing department provides services that enable and enhance teaching and learning through technology for the UCSC campus. Our services include computing labs designed for use as teaching space, collaborative learning, and for open access; faculty support for use and integration of instructional technology through instructional design, consultation, training, and other pedagogy support; online learning environments such as WebCT, Unix timeshares, and virtual computer labs; and the development and delivery of electronic course materials including websites, web applications, digital video, multimedia, etc.

UC SANTA CRUZ. THINKING AT THE EDGE.
