CSE 101
Introduction to Data Structures and Algorithms
Fall 2023

Description: Introduction to abstract data types and basics of algorithms. Linked lists, stacks, queues, hash tables, trees, heaps, and graphs will be covered. Students will also be taught how to derive big-Oh analysis of simple algorithms. All assignments will be in C/C++.

Prerequisites: CSE 12 or BME 160; CSE 13E or ECE 13 or CSE 13S; and CSE 16; and CSE 30; and MATH 11B or MATH 19B or MATH 20B or AM 11B.

Lecture: TTh 5:20 - 6:55pm  Earth & Marine B206

Coursework:

- **65% Programming Assignments:** Eight projects due at roughly 7-8 day intervals
- **10% Midterm Exam 1:** Tuesday October 24 (5:20-6:25pm, lecture to follow)
- **10% Midterm Exam 2:** Tuesday November 21 (5:20-6:25pm, lecture to follow)
- **15% Final Exam:** Tuesday, December 12 (7:30–9:30pm)

All scores are rounded to the nearest 10th of a percent. They will not be rounded further. No scores are curved. The following letter grade boundaries will be used to determine your grade in the class.

**Grading scale:**

- A+ 99.0% - 100%
- A  94.0% - 98.9%
- A-  91.0% - 93.9%
- B+  89.0% - 90.9%
- B  84.0% - 88.9%
- B-  81.0% - 83.9%
- C+  79.0% - 80.9%
- C  70.0% - 78.9%
- C-  68.0% - 69.9%
- D+  65.0% - 67.9%
- D  61.0% - 64.9%
- D-  59.0% - 60.9%
- F  0% - 58.9%

**Accommodations for Students with Disabilities**

UC Santa Cruz is committed to creating an academic environment that supports its diverse student body. If you are a student with a disability who requires accommodations to achieve equal access in this course, please contact the Disability Resource Center (DRC) by email [drc@ucsc.edu](mailto:drc@ucsc.edu) or by phone 831-459-2089. Once I receive your accommodation authorization from the DRC, I will be happy to meet with you in office hours to discuss how to ensure your full participation in the course. See [https://drc.ucsc.edu/](https://drc.ucsc.edu/) for further information.

**Academic Honesty:**

The Baskin School of Engineering has a zero-tolerance policy for any incident of academic misconduct. If cheating occurs, consequences may range from getting zero on a particular assignment to failing the course. In addition, every case of academic misconduct is referred to the students’ college Provost, who sets in motion an official disciplinary process. Cheating in any part of the course may lead to failing the course, suspension or dismissal from the Baskin School of Engineering, or from UCSC.

What is cheating? In short, it is presenting someone else’s work as your own. Examples include copying another student’s, programming assignment, or exam solution; allowing your own work to be copied; or in any way facilitating misconduct by others. You may discuss programming projects with fellow students, but your collaboration must be at the level of ideas only. You may freely give and receive help on the UCSC computer facilities, code editors and IDEs, the UNIX operating system, and on the proper use and syntax of the C and C++ programming languages. You may also freely use any *example code* posted by
me on the class webpage. However, you may not *copy, paste, email, transfer, view* or *share* in any way the *source code* for projects in this class.

Most of you are aware that various large language models (LLMs) like ChatGPT are readily available. *Our policy is that you may use LLMs while working on programming assignments, but be warned that they frequently give answers that are very wrong.* We will discuss how LLMs might be used effectively to understand the topics in this course.
