August 23, 2006

U 1001 C
Advice Letter No. 28753

Public Utilities Commission of the State of California

This filing reflects changes in the attached tariff schedules. The material consists of tariff schedule sheets as indicated on the sheets designated "List of Effective Sheets" shown below:

SCHEDULE CAL.P.U.C. NO. D13.	SCHEDULE CAL.P.U.C. NO. 175-T
9th Revised Check Sheet A	1061st Revised Sheet 1
	165th " " 1-A

This filing revises Schedule Cal.P.U.C. Nos. D13. Advanced Services, 13.2 Customized Switched Metro Ethernet (CSME) Service and 175-T Access Service, Section 2. General Regulations, to decrease certain rates, modify tariff language and removed the 10 year term pricing plan. No customers ever signed up for the 10 year term pricing plan.

In compliance with Section III. G. of General Order No. 96-A, we are mailing a copy of this advice letter and related tariff sheets to competing and adjacent Utilities and/or other Utilities, and interested parties, as requested. In addition, we are sending an e-mail copy of this advice letter to parties as requested. This advice letter with attachments may be viewed on AT&T California's Web-Site at <https://ebiznet.sbc.com/calreg/>. If there are any questions regarding the distribution of this advice letter, call 415.778.1299.

This filing will not increase any rate or charge, cause the withdrawal of service, nor conflict with other schedules or rules.

Anyone may protest this advice letter to the California Public Utilities Commission. The protest must set forth the specific grounds on which it is based, including such items as financial and service impact. A protest must be made in writing and received within 20 days of the date this advice letter was filed with the Commission. The address for mailing or delivering a protest to the Commission is:

Director, Telecommunications Division
505 Van Ness Avenue, Room 3210
San Francisco, CA 94102

AT&T CALIFORNIA

If you have e-mail capability, the protest must also be e-mailed to the Telecommunications Division at TD_PAL@cpuc.ca.gov.

A copy of the protest must be mailed or faxed (415.543.3766) to AT&T California on the same date it is mailed or delivered to the Commission. If this advice letter was served via e-mail, the protest must be served to AT&T California via e-mail at regtss@att.com.

We would like this filing to become effective August 25, 2006.

Yours truly,

AT&T California

(Signature on File)

Executive Director

13.2 CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (Cont'd)

B. SERVICE PROVISIONING (Cont'd)

1. Manner of Provisioning (Cont'd)

- g. Upon notice from the Utility that the CPE is causing, or is likely to cause, such hazard or interference, the customer shall take such steps as necessary to remove or prevent such hazard or interference.
- h. CSME Service supports full duplex communication.
- i. If a customer connects to the CSME network using a bridge or switch for Layer 2 connectivity, only 150 Media Access Control (MAC) addresses can be used per Layer 2 device, per port. Any additional addresses will be assessed additional charges, with a limit of 200 MAC addresses total per port as set forth in E. Rates and Charges, following.
- j. Repeater technology may be used for customers requesting CSME service from a serving wire center not equipped to provide CSME service or if customers are outside the technical limits of an Ethernet equipped Central Office. A technical review will be necessary to determine if service can be provided. Only one repeater can be used on a connection between the Ethernet equipped Central Office and the customer premises. A repeater will incur additional charges as set forth in E. following.
- k. CSME Service is not available in a meet-point billing arrangement involving other Carriers.
- l. A Letter of Authorization will need to be established if customers want to purchase a logical connection via an EVC to another provider (IXC, ISP or other) in order to ensure security and accuracy in the connection.
- m. A total of 8 Ethernet Virtual Connections (EVCs) may be configured per 10/100 Base T port should the customer wish to segregate traffic. A total of 64 EVCs may be configured per 1 Gbps port. Should the customer request more than 64 EVCs on 1 Gbps port, a technical review will need to be conducted to determine whether the network will support more than 64 EVCs.
- n. If the customer orders 10 Mbps or 100 Mbps bandwidth connection, the Utility will only provision the service using the 10/100 Base T Connection.
- o. The Utility will use controls to limit the amount of multicast and broadcast traffic to protect the CSME network against traffic storms. The maximum throughput of multicast traffic will be set at 1 Mbps per customer port, while the maximum throughput of broadcast traffic will be set at 200 packets per second per port. The Utility recommends that customers enable controls for multicast, broadcast and unknown unicast traffic within the customer network(s).

- 13.2 CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (Cont'd)
- B. SERVICE PROVISIONING (Cont'd)
- 3. Limitations (Cont'd)

The Utility shall not be responsible for error correction. Error correction is the responsibility of the customer's CSME compatible CPE.

The Utility shall not be responsible for installation, operating, maintaining, or adapting CSME to the technological requirements of any specific CPE.

The Utility shall not be responsible to the customer or user if changes in any of the equipment, operations, or procedures of the Utility used in provisioning of CSME render any facilities provided by the customer or user obsolete; or require modification or alteration of such equipment or system; or otherwise affect its use or performance, provided the Utility has met all applicable information disclosure requirements otherwise required by law.

Ethernet Virtual Connections (EVCs) do not provide traffic prioritization.

Service Level Agreements (SLAs) are not offered with CSME Service, however, Credit Allowances are applicable as set forth in B.5., following.

4. Technical Specifications

Technical specifications are set forth in the following technical reference:

Network Equipment Design Requirements (SBC TP-6200MP Issue 5, 10/03)
Ethernet Standards for SBC Local Exchange Companies (SBC TP-76412 Issue 2, 12/1/03)

This technical reference can be obtained from:

13.2 CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (Cont'd)

C. RATE REGULATIONS (Cont'd)

2. Term Pricing Plan (TPP)

a. General

CSME Term Pricing Plan (TPP) provides the customer with rate stabilization and discounted tariff rates. The CSME TPP provides for three (3) and five (5) year terms. Monthly extension will only be offered when a term contract has expired and the customer has not yet signed another term contract. (D)

CSME TPP monthly rates will be exempt from Utility initiated rate increases throughout the selected service period. Should the Utility increase its rates during the CSME TPP service period, the customer would continue to pay the rates in effect at the time the customer elected to establish service under the CSME TPP.

Decreases in CSME TPP monthly recurring tariff rates will be passed on to customers who participate in a CSME TPP.

b. Renewal of Term Pricing Plan

At the end of a Term Pricing Plan, the customer may renew with a written notice of intent to renew no later than 90 days prior to its expiration, for any TPP in effect without incurring new nonrecurring charges.

If the customer elects not to renew the TPP or does not notify the Utility of its intent to renew the TPP, the service will automatically be billed under the Monthly Extension rates in effect at the time the TPP expires until the customer cancels or renews the service with a new TPP term. Subsequently, customers under the Monthly Extension rates may convert their existing service to either a three (3) or five (5) year TPP. The customer will not be assessed any associated non-recurring charges as long as the physical serving arrangement does not change. (D)

Monthly Extensions are not available to new service.

13.2 CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (Cont'd)

C. RATE REGULATIONS (Cont'd)

2. Term Pricing Plan (Cont'd)

c. Change of Term Pricing Plan

At any time, a customer may change an existing TPP to a new TPP only when the new TPP payment period is longer than the remaining period currently in effect, without any Termination Liability Charges or nonrecurring charges applying as long as all other aspects of the service and facilities remain unchanged. The new TPP begins on the service order completion date and is treated as a new TPP period.

d. Service Available Under CSME TPP

A customer may elect to participate in the CSME TPP for the CSME Standard Features and Repeater rate elements only.

e. Terms and Conditions

Customers must specify the length of the service period at the time the CSME is established.

(D)
|
(D)

Customers may move their existing service to a new location without incurring termination charges provided all of the following conditions are met:

- (1) The customer maintains the existing TPP at the new location or establishes a new TPP equal to or greater than at the old location;
- (2) During the Term Payment Plan, a customer may move CSME location to another premises in the same LATA and keep the Term Plan in force without assessment of Early Termination Liability, provided no lapse in billing occurs;
- (3) The customer's request for disconnect at the existing location and the request for service at the new location are received at the same time;

C. RATE REGULATIONS (Cont'd)

2. Term Pricing Plan (Cont'd)

e. Terms and Conditions (Cont'd)

Customers may move their existing service to a new location without incurring termination charges provided all of the following conditions are met: (Cont'd)

- (4) The customer's disconnect order for the existing service references the new connect order for the new service;
- (5) Moves of one location to a premise in a different serving office may result in a change in the monthly charges. Nonrecurring charges, as appropriate, are applicable as set forth in Section E. Rates and Charges, following.
- (6) If the customer moves more than one location of the service concurrently the customer will be liable for Termination Liability charges as this is considered a complete disconnect of the service.

Customers will be allowed to upgrade from CSME to OPT-E-MAN® Service without incurring termination charges provided all of the following conditions are met:

(N)

- (1) Customers must request a disconnect order for the existing CSME locations and request a new connect order for OPT-E-MAN® at the same location.
- (2) The term of the new OPT-E-MAN® Service TPP must be equal to or greater than the remaining term on the existing CSME TPP.
- (3) The existing CSME service must be in service for a minimum of fifteen (15) months for a three (3) year TPP or eighteen (18) months for a five (5) year TPP.
- (4) Upgrade to OPT-E-MAN® is subject to the availability of fiber from premise to premise and the availability of OPT-E-MAN® Service. Where facilities and/or operating conditions are not available, Special Construction charges as set forth in Schedule Cal.P.U.C. No. 175-T, Section 15 may apply.
- (5) Customer's network configuration must be remain the same. The number of OPT-E-MAN® locations must be equal to or greater than the current number of CSME locations.
- (6) A minimum of %50 of the bandwidth connection for each individual connection must ordered and maintained for OPT-E-MAN®. Example:

Customer has a 1 Gbps CSME bandwidth connection, customer is required to purchase a minimum 500 Mbps OPT-E-MAN® bandwidth connection.

Material omitted now located on Sheet 29.1.

f. Termination Charges

(L)

In addition to any special construction liabilities, as set forth in Schedule Cal.P.U.C. 175-T, Section 15, customer termination liability for cancellation of CSME TPP shall be equal to:

- (1) Any unpaid Special Construction or nonrecurring charges (excluding any waived charges); plus
- (2) Fifty (50) percent of all recurring charges for the remaining months of the customer's term which the customer agrees to pay within 30 days.
- (3) The termination charge is calculated as follows:

(Monthly Recurring Rate) X (Months remaining in TPP term) X
(Termination Billing Period Percentage)

Example: A customer with a \$1800.00 monthly rate terminates service with 10 months remaining in a 3 year TPP term.

The termination liability charges would be calculated as follows: $(\$1800.00) \times (10) \times (.50) = \$9,000.00$
