In Chapter 6 of Harmon & Gross (2010), there is a description of how to frame your methods section. Use their checklist, at the end of the chapter, to ensure that you are including all the elements that belong in your methods section.

**Turn in (on 29 April, 2011):**

1. **THREE hardcopies of your methods section, with any relevant figures/tables.**

Also be prepared to talk with your peers about the outlines that were turned in on April 22nd.

AND, remember that a full draft of your results section, including revised figures, will be due on **May 6th**, so you should also be working on the results section this week.
