

## Jacob N. H. Abrahams

214 Segre Pl, Santa Cruz, CA 95060  
(312) 890-3302 abrahams@ucsc.edu

<b>Professional Overview</b>	Graduate student, beginning in 2017, in Planetary Science, interested primarily in planetary interiors and evolution, as well as questions of planetary formation. My background is in Physics and I try to leverage those skills to solve problems in Planetary Science.
<b>Education</b>	PhD Candidate: Planetary Science University of California Santa Cruz, Santa Cruz, CA Majors in Physics and Geophysics, Minor in English California Institute of Technology, Pasadena, CA, class of 2017 <ul style="list-style-type: none"><li>• GPA 3.5</li><li>• Relevant Coursework: Analytical Mechanics, Planetary Physics, Geodynamics, Programming in Python and C, Waves, Statistical Mechanics, Quantum Mechanics, Physics Labs, Order of Magnitude Physocs</li><li>• Treasurer of Bridge Club (2013-2016); Treasurer of Feminist Club (2015-2016); Curriculum Director (2015), Recruitment Officer (2016), and Counselor (2013, 2014, 2015) with Caltech Innoworks, a science camp for middle school students.</li></ul>
<b>Work Experience</b>	<p><i>Teaching Assistant</i> Spring 2020 University of California, Santa Cruz, Santa Cruz, CA Fundamentals of geophysics. Involved redesigning and running labs for remote teaching.</p> <p><i>Teaching Assistant</i> Spring 2015 and Spring 2016 California Institute of Technology, Pasadena, CA TAing an introductory Geology class. Involves writing and grading problem sets, running lab sessions, and holding office hours.</p> <p><i>Peer Tutor</i> Fall 2015-Spring 2017 California Institute of Technology, Pasadena, CA Tutoring Caltech students, ~8 hrs/week, in subjects including Calculus, Classical Mechanics, E&amp;M, Differential Equations, Complex Analysis, Linear Algebra, and Quantum Mechanics.</p> <p><i>Teacher</i> Summer 2013 Young Scholars Program, Chicago, IL Taught group theory, geometry, and programming to talented middle school students.</p>
<b>Research Experience</b>	<p><i>Graduate Student Affiliate</i> Fall 2020 – Ongoing Europa Clipper, Jet Propulsion Lab, Pasadena, CA Member of the UV Spectrograph team on the Europa Clipper mission, exploring how to use UVS data to constrain Europa's global shape.</p> <p><i>Research Fellowships</i></p> <p>MIT Dep. of Earth, Atmospheric and Planetary Sciences, Cambridge, MA Summer 2016 Computational thermal modelling of partially differentiated planetary bodies, focused on predicting the presence and timing of planetary dynamos. Simulated competing thermal evolution models to determine their agreement with recent paleomagnetic measurements of undifferentiated material which cooled in a magnetic field.</p> <p>Caltech Department of Geological and Planetary Science, Pasadena, CA Summer 2015 Research on inner-core translation and True Polar Wander for Earth and Mercury. Performed a combination of computations by hand, theoretical physical considerations, and multi-day computations programmed in Python.</p> <p>Caltech Department of Geological and Planetary Science, Pasadena, CA Summer 2014 Research on Human Magnetoreception. Developed electromagnetic shielding to protect experiments from interference.</p>
<b>Honors</b>	Waters Award for outstanding PhD research proposal 2020 Qualifying Exam honors, UCSC 2020 Chancellor's Fellowship, UCSC 2017-2018 Finalist - Gee Family Poster Competition 2016

**Service** Graduate Student Representative, UCSC EPS department 2020 - Ongoing Organized  
department seminar series, UCSC EPS department Spring 2020
