2. I think it's similar and I think
is a snow there two and it rain there what ever
UP in the mountains by Sierra Nevada
I think longitude is forty, and I think latitude is 121

3.

4.

U

C

A series of horizontal lines for writing, consisting of 18 lines in total, starting from the top line and extending down the page.

2. It is cold when it's snow. Heard. Ke

3. Yes I would live there because like the water. That why.

4. That ~~because~~ because similar pleases
are bigger it is.

0

2. ~~Jim~~ sometimes and it ~~is~~ less, but if rain
alot but is dosen't snow alot but if you in mountain
will snow and the rain will something as the
snow and will make a rive all the way to the
ocean. Some ~~mountain~~ have cities like mts shasta. I think

3. "No" because because ~~do not want~~ ^{to} live there
I want live low elevation

4. California is different than Mexico

E

2. I would like to live in Los Angeles because there are lakes and water and streams and rivers also they are hot in rivers or there is only 1 or 2 deserts and the longitude longitude and when you run west or to east the longitude moves every time you run or walk the longitude moves when you turn left or right or straight or the longitude and longitude could move only if you want to run left or right the longitude longitude always move when you run and I saw a movie that they were on the desert and they were running and the water was dried.

3. I would not want to live in Santa Cruz and in Idaho because the degrees it is really hot measured in seconds the degrees are hard because some of them are hot and the other ones are warm the warm ones are a little bit cold and the hot ones are really hot and the degrees that are hot make people sweat and I would not want to live in Idaho because it is really hot and I would not even want to live in Idaho because it is hot and in Idaho and Santa Cruz is hot and in Los Angeles it is warm.

4. ~~California~~ California it is sometimes
cold and hot, and in Mexico
it is really hotter than California
they are really different in degrees
and minutes and they are also
different in seconds and they get water
from America water is cold in California
and in Mexico and it falls a lot of
water in both states it is hot
and warm and sometimes in some
states they are some water falls
and the region is San Francisco
it sometimes rains a lot or it sometimes
rains a little bit and when the clouds are
full of water the clouds throw the
water down and the clouds move to
another state.

2. It is gets Hot and cold
I would like to live in California

3. It is located in the Desert.

4.

Written responses to California Geography Test

Name:  

2. I think that people would like to live in the snow because they are mountain cities and latitude and longitude are same because one means bigger and the other one is smaller and longitude is bigger than latitude.

H

3. I think location is where located at and elevation is what high is it if you live in low elevation or high elevation. Latitude is that where you live is a small elevation and longitude is a high elevation and it depends if it hot or cold. I would live in Modesto because it's cool over and it's doesn't get really hot but it is hot.

~~the~~ ~~most~~ ^H the same but Mexico
is more poor but California is more
bigger than Mexico but they both have
stores and Mexico is little bit of
bigger but Mexico has big stores
and also California and there both similar
because there countrys and there both
fun because you could travel were
every you want because there both
countrys and now you Now about
California and Mexico

H

2. Their both mountain cities,

men could have ~~wanted~~ jobs like hunters
women jobs could be at working at stores
They could a ski or Snow boarding Park go
camping,

3. I think it would be to live for like
five months because it hardly rains I think
it's snow so I can snow board down
a mountain.

The other reason is because its some times
be and cold.

I

~~scribble~~

I

2. City 1 and City 2 are similar because they are both hot. It rains a little and it rains too because it is closer to the ocean. They are not mountain cities because they are close to the ocean. Maybe they all have the same jobs as us because they are not mountain cities (California and City #1 & City #2). The climate that they have is rain and kind of cold.

3. I like to live in Watsonville because there is not much rain. I like to live in Watsonville because here is not much rain. I like to live in Watsonville because here is many fun games. I would like to live in Sacramento because it is the state capital. It is really cool to live at the state capital. I sometimes say that I don't want to live there because it has too much people. I like to live here in Watsonville because there is not much people.

2. City number one is a little bit close to Tahoe National Forest. It is

3.

I think the region that is 115°F in July and 86°F in July is the Desert Region.

I would not like to live there because

4.

7

7

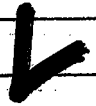

A series of horizontal lines for writing, consisting of 15 parallel lines.

2. I think that one is bigger than the other because one looks bigger. It rains a little bit. It snows a little bit too. One is a mountain city. I think some people may do snow plowing. One is cold one is warm.

✓

3. I would live here because it doesn't really rain that much or get hot that much not like other places. Also if you live somewhere where it's cold and far away you might freeze to death and you could die of all the hungry.

4. Mexico ~~is~~ has more places you could go to. And California looks smaller than Mexico. California has less places to go to. Mexico has better fruit than California. Also Mexico is more hotter than California. The houses are way older. And have better Candy than California.

m

Written responses to California Geography Test Name: _____

2. They are similar because they both are really hot places they don't get that much rain some times also its able to get to 95 degrees in the ~~summer~~ time and in the winter times.

3. I will like to live here because you could grow plants because it rains alot in colifornia. The latetud of californiq is 38 degrees and 121 minutes. I think the city is locaded near the ocean.

4.

m

A series of horizontal lines for writing, consisting of 18 lines in total, starting from the top line and extending down the page.

2. City one and city two are similar because they both are close to the land. It snows a lot because it is by the mountains. They are mountain cities. People might have jobs like selling hot chocolate because it cold. another job is selling the frozen animals and like the ones you hang up at your house. The climate is cold because there in the mountains. when you live in the mountains you cant be outside a lot because you can die if you get to cold or you can get sick in both of the cities. In the mountains there is not that much rain because before the rain hits the mountains it would freeze.

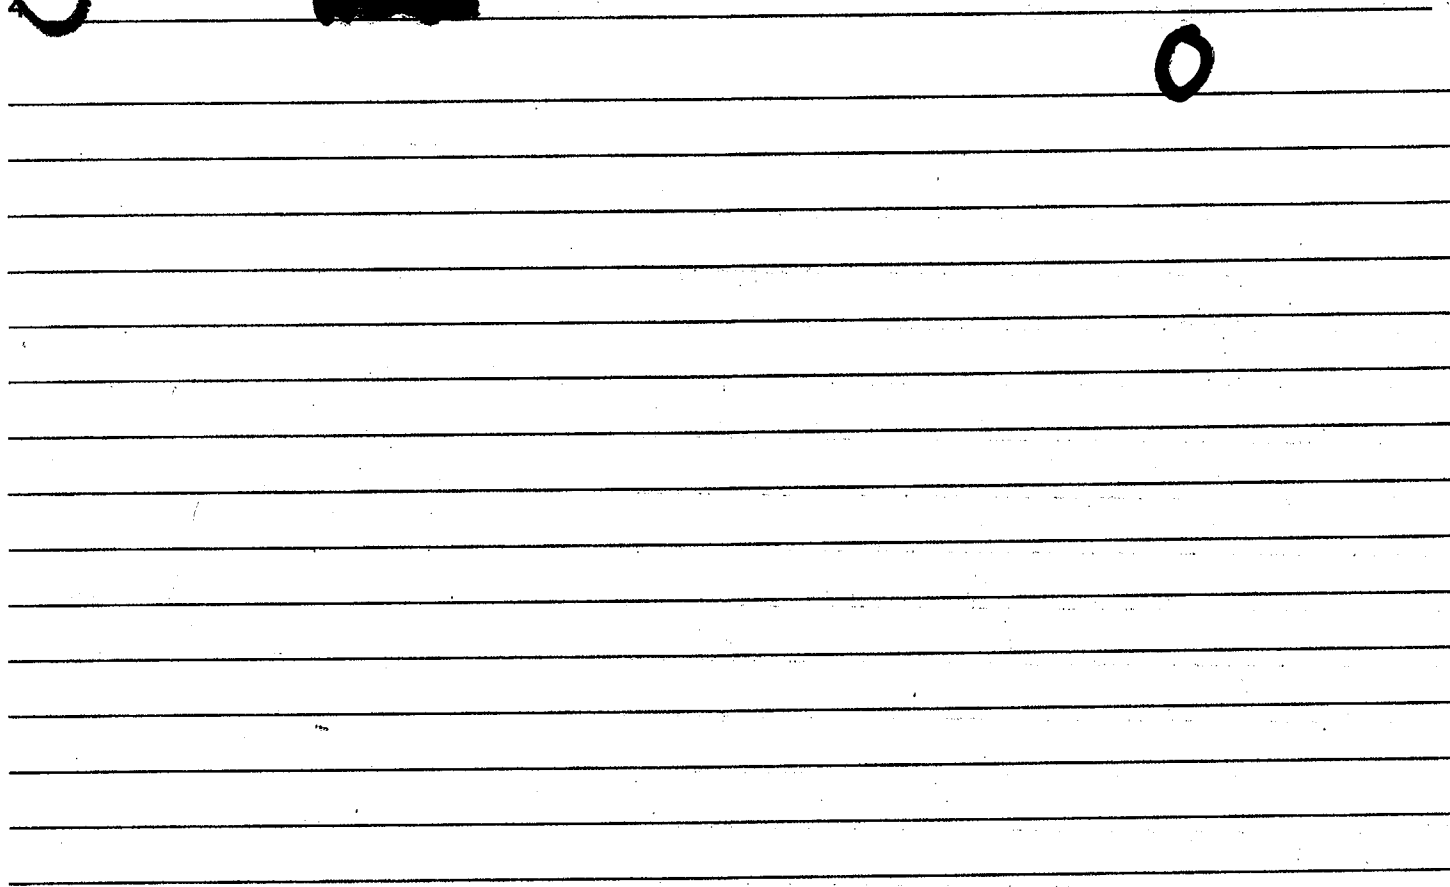

3. I would live in California's part where the temperature is 40 degrees because there's a lot of snow and I do want it to snow a lot. because I like the snow because I'm from Chicago, and I do want to live where it's sixty degrees because it's even more snow. I do want to live there because I would be cold. In the part of California where it is the coldest a lot of people die because when it's cold the air gets hard so you can't breathe that much. I would want to live there I want to live there because when it's cold you get more treats like hot chocolate, nice fresh bread to dip in the bread.

4. California and Mexico are the same because they both have a lot of Spanish speakers. Why because when Mexicans need to leave to get a job in Mexico a lot of them come to the United States because there's freedom and some Mexicans sneak over here to live a lot of Mexicans in Mexico have freedom but not all of them that's why they come to the United States. Well that's why Mexico and California are the same.

2. City #1 is similar to City #2 by them being cities and they have people stores and all of those things. In city #1 it rains a lot because it's in high elevation and it snows in both cities because they are at low elevation and don't have that many people but some times they do have lots of people. Yes, they are Mountain cities because it rains and snows a lot. People work like teaching kids how to ski or they could work in a shop.

3. The city I think it is in the South in California because it does not rain a lot in the south. I think that that city is in low elevation because that's where it doesn't rain that much.

I would like to live there because it's not that cold and you can't freeze. I also want to live there because it's not that hot either.

2. Similarities: They are both places people live in. How much rain or snow? Maybe city number 1 snows because it is by Mount Shasta and probably hardly any rain because lots of snow falls. And probably in city number 2 not much rain and probably no snow because it is close to San Diego. I kinda think that city number 1 is a mountain city. And I don't think city number 2 is a mountain city because it is close to San Diego. I think that people's job in city number 2 are tourist and doing sky resorts. City number 2's climate is cold and snowy. City number 1's climate is sunny and a little bit of rainy.

3. Would you want to live there? I don't know I might like it there. Why or why not? Why not because I don't really like hot temperatures over 70-90. And also because there is a little rain.

9.

~~XXXXXXXXXX~~

P

[Blank lined area for writing]

[Faint, illegible handwriting at the bottom of the page]

2. They are similar because it rains there not always but some times. And I think one of the the cite is part of mountains because it is very very close. One of the jobs I think one job you could have ther would be like Saling skis because it is high elevation and it snows there.

3. I think this city is located by the City of Fresno because it is sometimes hot and sometimes cold. I think I wouldn't live there because it is not most of the time because its low elevation.

Q

~~Q~~

Q

A series of 17 horizontal lines for writing.

Mountain Region

2. Number one is very snowy it probably gets about 20 feet of snow. And people live about 3 miles from each other. And number two is in the middle it gets about 2 feet of snow every 3 years. And they are alike because the population is not exactly the same but close.

3. I think it is the Mountain Region because the rainfall is very high and it shows that it is very cold. And I would not want to live there because it is very cold and windy.

4. ~~_____~~ ^g like California was a Monterey. But our Monterey is close to the sea. And Mexico is right in the middle of Mexico.

R

2. They are NOT similar because one is empty and one is into. it doesn't snow that much because it is so hot in California. if it snows it is just a little bit.

NO They are NOT mountain cities.

They might have better work.

They might work as a principles

and fields. NO I can't describe the weather because I don't work there.

3. I would like to live here because it is fun and beautiful and we have lots of water if

we didn't have water we would not

survive. That's why I want to

live here to survive.

I know in California it doesn't rain that much because it is so hot but in some other places it does rain a lot. Today it was 69 degrees yesterday it was 72 degrees.

4.

2

5

A series of horizontal lines for writing, consisting of 16 lines in total, extending across the width of the page.

2. Both cities are closed to the Pacific ocean.

The first city its 40 degrees it snows. The second city its 122 degrees it snows kind of alot. The first city is a mountain city. The second one its hot. In the first city the climate is on the middle so people can work on stores teacher, Doctors, and more. In the second city its kind of cold so may be not very much people work there.

The climate on the first city its kind of in the middle its cold and hot too. In the second city its kind of cold. I would like to live in the second city because maybe its kind of cold and, I like cold places.

3. I think that in December doesn't rain a lot.

The months that rains alot is in Jan, Feb, Mar only these months. The months that doesn't nearly rain are May, Apr, Jun, Jul, and thats all. In Jul is the hottest month. The coldest month is December. This is incredible.

I like high and low elevation. I like hot days because you get to go to the Beach. and I like cold days because I get to go ski and I like when they put the chimney too.

T

~~scribble~~

T

2. They are both similar of their at California. Also it snows at City #1 and on City #2 it rains and doesn't snow. They both have mountains and their are big. They might have jobs like working in places that sale tacos or burittos also they might work at stores like Kmart or target. The climate the cities have are cold and sometimes hot. Other comparisons I think should go hear is that if you could go to places you might not have see snow or rain if it might be cold or hot.

3. What I think the elevation, latitude, longitude, climate is in this graphs is the latitude is like 40 degrees and longitude is like 120 degrees I think the climate is hot and I think elevation is high and sometimes cold. I will like to live there because it is going to be hot and sometimes cold not always.

California and Mexico are similar of
they both have places to go like in Mexico
they could go to Guadalajara and on
California you could go to Las Vegas
and visit also they are similar of they
have Mountains and rain falls and
it both places don't snow and also
they both have Ocean and water.

U

2. They are similar by how some people don't want to live there. It snows out in one place and doesn't snow in one but it rains a lot in the other. Well one is but the other is in low elevation. They probably have trucking, mailmans, water people, construction, and delivery. In one site its probably cold and the other is hot probably in the summer their hot but when its winter its cold.

3. I think the latitude and longitude is ~~is~~ because its in the mountain. The water supply is ~~is~~ or more or less. The climate is always hot ~~and~~ I think the region is the desert region. I would like to live there because its probably hot if it ain't I will steal live there.

✓ The ~~two~~ ~~states~~ ~~are~~ ~~long~~ ~~states~~ ~~because~~ ~~they~~ ~~both~~ ~~point~~ ~~downward~~ ~~are~~ ~~long~~ ~~states~~.
✓

2. It barely rains city #1 and it
pours snow in city #2. City number
2 is a mountain city number 1 job
might be farming. City number 1
will be very hot.
City number 2 will be always
cold.

3. I would like to live there
because the temperature get
pretty high, but not too high.
And I like to be where
it's hot, because it's so hot
you always want to go swimming.
But some times you can't. I think
it is in the central valley.
City number one has more population.

4.

W

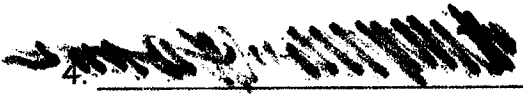

~~W~~

W

Lined writing area with 15 horizontal lines.

2. City #1 is similar to City #2 because they are both part of California and almost have the same amount of records. City number 2 probably gets a lot of rain since it is almost in the middle of the Mojave Desert and the Colorado Desert. City number 1 is probably more rainy and snowy because it is close to the Sierra Nevada. City #2 is not a mountain city, again it is closer to the deserts. Although City #1 is a mountain city because it is near the Sierra Nevada.

3. I think this city is part of the desert region because the high temperatures for the month were near the hundreds more often. The elevation for that particular city is probably very low because the amount of rainfall per month was fairly low. The latitude for this city is about 35 West, the longitude for this city is about 118 South. The population for this city is about 11,000 people. I would not like to live here because I would not want to get sun burnt.

X

X

A series of horizontal lines for writing, consisting of 15 lines in total, starting from the top line and extending down the page.

2. They are both similar because city #1 has a low elevation like city #2. I think it does not rain very much or snows because it has a low elevation and it's more warmer. No they are not mountain cities. The people might have business and jobs like constructing house and other jobs. The climate is warm in these two cities because it never snows. These cities are almost close to the coast. I think

3. I think the elevation of this city is 100 ft because it hardly never gets any rain. I say the latitude is 37 degrees 0 minutes and 0 seconds, longitude: 120 degrees 0 minutes and 0 seconds.

Y 4.

Y

A series of horizontal lines for writing, starting from the top line and extending down the page.

2. They are similar because they are both big cities. In town number 1 it snows and rains and in city number two it only rains. They are both Mountain cities. People might be working in the persons how make houses. It will be hot some times and cold some other time.

3. I think the location's elevation is 99 feet below ^{sea} level. The latitude is going to be hard to find also the longitude is hard to find. I think the climate is going to be hot. The water supply is the aqueduct. The population is about 1,000 people. I would not live there because there are really not lot's of people.

4

~~scribble~~

2

Blank lined writing area

2. City number 1 is similar because they both are at low elevations. It rains like in Watsonville. They are cities. They might have a job like. The one in Watsonville. I think the climate is not that hot and not that cold.

3. I think the region is the desert regions. I think it is because it doesn't get that much water and the temperature is high. I will not want to live there because it is too hot and I need to get water from somewhere else. I think the elevation is a kind of high elevation. The desert region

1. The desert region almost never rains and it is very dry. The population is from 5,000 to 10,000 people.

4. California ~~AA~~ Mexico similar because they
both have a the state ~~are~~ around them.

AA

2. They are similar because they are both in low elevation. It rains a little not that much or not that little hardly ever snows. There are no mountains cities. There jobs might be in the fields, teacher, doctor, ect. Hot, not that hot cold but not that cold kind of in the middle of those two.

3. I think it is located in Sacramento.

oo, I will not want to live there because it is too hot there.

4. They ~~are~~ ^{BA} the eastern part of the Pacific Ocean. They have the same legend of Low/Hills/Mountains. They have the same Low and High elevation.

AB

AC

2. City number one is in the central valley and some jobs over there would be farming, or crop growing. probably it might be hot during summer. it probably get 5 inches of rain per year.

X City number 2 is located in the coastal region. Some jobs would be fishing or dairy. the climate would be warm. they would get 3 inches of rain per year and 0 inches of snow.

3.

X. I think ~~some~~ is Death Valley because it's really hot
over there. few people live there because it's temperature
and because it gets few rain fall per year.

AC

4. Mexico and California are similar because they are
in the west coast and because they have similar places
like Santa Cruz and Monterey but they are different

2. The cities are both similar because they are both low elevation. Also, because they have a lot of heat. It's about 100 degrees daily bases. And in the winter it's freezing it's so chilly. It's about 45 degrees. The rain and the snow are so in both cities in city one it only gets 1 inch of rain every year. And city two it gets 5 inches of rain. Also they both get no snow. They're both not mountain cities. There jobs can be growing crops, working as a teacher, work in a gasoline station, etc. Sometimes it's stormy at nights but not a lot of times does it storm.

3. The elevation is about 500 feet above sea level. The latitude is 40 degrees and the longitude is 127, for city one. City two is 35 Latitude and 119 Longitude. It's 4000 ft above sea level. The climate very hot in the summer and very cold in the winter. There water supply comes from wells and aquifers. Sometimes the water runs out from the cities. And there population is 100 people per square mile.

No, because they ran out of water and I would want to live in high elevation.

9A

A series of horizontal lines for writing, consisting of 15 parallel lines spaced evenly down the page.
