The Marine Environment
Ocean Sciences 101
Winter, 2005

MWF 9:30-10:40 • Thimann Lecture Hall 001

Course Instructor: Raphael Kudela
Office Hours: Monday-Tuesday 1:00 - 2:00 or by appointment
Office Location: Earth and Marine Sciences Building A461
Contact: kudela@ucsc.edu • 459-3290

Teaching Assistants: Katie Alt Griffith, kalt@ucsc.edu
Sherry Palacios, sherry_palacios@yahoo.com

Discussion Sections: E&MS Room D266 (Ocean Sciences Teaching Lab)

Course Website: http://ic.ucsc.edu/~kudela/OS101/

Course Textbook Available at Baytree Bookstore:

Course Description from UCSC catalogue: An introduction to the marine environment stressing the interaction of physical, chemical, and geological factors in the ocean. Provides the oceanographic background needed for studies in marine biology. Students taking the prerequisite physics and math courses concurrently may enroll in the course with instructor permission.

Prerequisites: Chemistry 1C, Physics 6B or 7B, and Mathematics 11B or 19B.

Instruction Level, Goals and Format: This is an upper division course for Marine Biology Majors. The course is designed to introduce the student to the basic concepts in oceanography, to provide the opportunity to apply these concepts to various problems and to enable the student to evaluate issues in oceanography that will be encountered in every day life. The format of the class is combined lectures and discussion sections. The instructor will typically give lectures, but guest lecturers will be used as appropriate.

Discussion Sections: Students are REQUIRED to attend section meetings to obtain credit for the class. Students will fill out enrollment cards at the end of the first day of class, Fri. January 6, and select several sections that will fit into their schedule. The finalized student lists for the sections will be posted on the class website and outside the door at E&MS D266 no later than Monday Jan. 9. Students are expected to attend section meetings starting the second full week of instruction, i.e. the week beginning Jan. 9. The purpose of the sections is to introduce students to
additional materials to complement the lectures and to provide a forum for students to ask questions in a more personalized, smaller classroom setting than that available in the lecture hall. Homework assignments (given out in lecture) will be turned in and discussed in the discussion sections.

**Exams:** There will be three exams, worth 15%, 15% and 20% of the total grade (so 50% for all exams). The final exam will primarily cover the last third of the lectures, discussions, and assigned readings, but there may be comprehensive questions requiring you to synthesize information from the material covered during the quarter. The exams will be based on lecture material, assigned readings, and the major concepts covered in the Discussion sections. The Final Exam is scheduled for **March 21, 4:00-7:00 PM**, so plan your vacations appropriately!

**Evaluations:** Your final grade will be based on the three exams (50%), homework assignments (10%), your Oceanography Term Paper (20%) and Oral Presentation (10%), and your participation and attendance in both the lecture and discussion sections (10%).

**Homework Assignments:** Approximately weekly assignments will be given out in the lectures. These will be turned in during the assigned Discussion Sections, and gone over by the TAs. If you are absent from lecture when a homework assignment is made, you will NOT be able to make it up without the consent of the instructor.

**Oceanography Term Paper:** A 10 (+ or - 2) page synthesis (double spaced) summarizing 3-5 original journal articles on a well-defined and narrowly focused topic. The purpose is to have you gain familiarity with looking up original scientific research articles on a particular topic and presenting a synthesis of 3 such articles on a topic dealing with the oceans. Figures should have captions and be referred to and discussed in the text. You will present an overview of the term paper to the rest of your section (with A/V materials, preferably Powerpoint), with an expected length of 5 minutes, subject to change (the time allotted depends on the number of students in each section).

**Attendance Policy.** Attendance at lectures is strongly encouraged since both the lecture and text materials will be included on homework and examinations. For exams, no make-ups will be given, except in the case of documented personal or medical emergency. If you cannot attend a scheduled examination due to illness, a written note from your doctor must be provided to the instructor within 3 days of the missed exam. If you cannot attend a scheduled exam because of a personal or professional obligation, you must notify the instructor AT LEAST ONE WEEK IN ADVANCE. All make-up exams will be short answer/essay. Attendance in Discussion sections is MANDATORY, and your grade will be reduced for missed sections. Excused absences must be requested following the same format as for missed exams.

**Plagiarism Policy.** Students are expected to do and turn in their own work. Cheating and/or copying is not tolerated, and will result in an automatic failure for the assignment. Please refer to University policy for the difference between citations and plagiarism; students are responsible for stated University policies.

**ADA statement:** The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. If you believe you have a disability requiring an accommodation, please contact the instructor and your TA as soon as possible after the beginning of class.
