

CSE 101

Introduction to Data Structures and Algorithms

This is **not** an independent programming assignment.

Instead, it is an optional re-submission of pa2. Any submission to pa8 will replace your score for pa2, **even if the new score is lower**. Use the grading scripts (check Hou-I Lin's Piazza posts) to make sure your new score is not lower than the original. There will be **no grace period for pa8**, and **no extensions of any kind**.
