

CSE 101

Introduction to Data Structures and Algorithms

Winter 2025

Description: Introduction to abstract data types and basics of algorithms. Linked lists, stacks, queues, hash tables, trees, heaps, and graphs will be covered. Students will also be taught how to derive big-Oh analysis of simple algorithms. All assignments will be in C/C++.

Prerequisites: CSE 12 or BME 160; CSE 13E or ECE 13 or CSE 13S; and CSE 16; and CSE 30; and MATH 11B or MATH 19B or MATH 20B or AM 11B.

Lecture: MWF 2:40pm - 3:45pm Media Theater M110

Class Webpage: <https://people.ucsc.edu/~ptantalo/cse101/Winter25/>

Instructor: Patrick Tantalo <https://users.soe.ucsc.edu/~ptantalo/>

Email: ptantalo@ucsc.edu

Office Hours: Tuesday 10:00 - 12:00pm & 2:00 - 4:00pm [Zoom Link](#) (Uses CruzID Gold)

Meeting ID: 962 6293 6059

Dates: Tuesday January 7 - Tuesday March 11

Teaching Assistants:

Engin Tekin	etekin@ucsc.edu
Mahyar Vahabi	mvahabi@ucsc.edu
Suryakiran Valavala	suvalava@ucsc.edu
Sanjana Eravelly	seravell@ucsc.edu
Anannya Neog	aneog@ucsc.edu

Course Tutors: TBA

LSS Small Group Tutor:

Jasmine Fortez jfortez@ucsc.edu

Required Text:

Introduction to Algorithms (4th edition) by Cormen, Leiserson, Rivest and Stein. MIT Press 2009 ISBN 978-0-26-204630-5. On reserve (2-hour loan) at the [Science Library](#).

Recommended Texts:

Open Data Structures (pseudo-code edition) by Pat Morin. <https://opendatastructures.org/>
Data Abstraction & Problem Solving with C++ (6th edition) by Carrano & Henry. Pearson 2013 ISBN 978-0-13-292372-9.

Coursework:

50% Programming Assignments: Eight projects due at roughly 8 day intervals
15% Midterm Exam 1: Friday, January 31, 2:40pm - 3:45pm
15% Midterm Exam 2: Friday, February 28, 2:40pm - 3:45pm
20% Final Exam: Tuesday, March 18, 12:00–2:00pm

All scores are rounded to the nearest 10th of a percent. They will not be rounded further. No scores are curved. The following letter grade boundaries will be used to determine your grade in the class.

Grading scale:

A+	99.0% - 100%
A	94.0% - 98.9%
A-	91.0% - 93.9%
B+	89.0% - 90.9%
B	84.0% - 88.9%
B-	81.0% - 83.9%
C+	79.0% - 80.9%
C	70.0% - 78.9%
C-	68.0% - 69.9%
D+	65.0% - 67.9%
D	61.0% - 64.9%
D-	59.0% - 60.9%
F	0% - 58.9%

Accommodations for Students with Disabilities

UC Santa Cruz is committed to creating an academic environment that supports its diverse student body. If you are a student with a disability who requires accommodations to achieve equal access in this course, please contact the Disability Resource Center (DRC) by email drc@ucsc.edu or by phone 831-459-2089. Once I receive your accommodation authorization from the DRC, I will be happy to meet with you in office hours to discuss how to ensure your full participation in the course. See <https://drc.ucsc.edu/> for further information.

Academic Honesty:

The Baskin School of Engineering has a zero-tolerance policy for any incident of academic misconduct. If cheating occurs, consequences may range from getting zero on a particular assignment to failing the course. In addition, every case of academic misconduct is referred to the students' college Provost, who sets in motion an official disciplinary process. Cheating in any part of the course may lead to failing the course, suspension or dismissal from the Baskin School of Engineering, or from UCSC.

What is cheating? In short, it is presenting someone else's work as your own. Examples include copying another students', programming assignment, or exam solution; allowing your own work to be copied; or in any way facilitating misconduct by others. You may discuss programming projects with fellow students, but your collaboration must be at the level of *ideas* only. You may freely give and receive help on the UCSC computer facilities, code editors and IDEs, the UNIX operating system, and on the proper use and syntax of the C and C++ programming languages. You may also freely use any *example code* posted by me on the class webpage. However, you may not *copy, paste, email, transfer, view* or *share* in any way the *source code* for projects in this class.

Most of you are aware that various large language models (LLMs) like ChatGPT are readily available. Our policy is that you may use LLMs while working on programming assignments, but be warned that they often give answers that are incorrect or misleading in subtle ways. We will discuss how LLMs might be used effectively to understand the topics in this course.

Please see the following links for the official UCSC policies on Academic Misconduct for [Undergraduate Students](#) and [Graduate Students](#).

Important Dates:

Waitlists expire: Wednesday, January 15 (permission codes required as of this date)

Add/Drop/Swap deadline: Friday, January 24 (add by petition only after this date)

Withdraw from class deadline: Tuesday, February 18
