

FAQs

Q: " I checked my grade and it said that I received a D in the class. Is this correct? "

A. Yes.

Q: " I checked my grade and it said that I received a F in the class. Is this correct? "

A . Yes.

Anyone with a D or F got less than 50 percent on the final (less than 100 out of 200).

Anyone with an F got less than 40 percent on the final (80 out of 200).

Q: "I don't know why I got a B. What was my final grade? "

A. Between 100 to 150 out of 200.

Q. Can I pick up my final exam?

Yes. Monday April 2. My office. 3 to 5 pm.

Q. I need to pass calculus! If I do not want to flunk calculus again, what should I do?

A.

i) Learn algebra. ('Algebra' here includes exponents, logarithms, and the ability to graph linear and quadratic functions.)

ii) Ask yourself, about each concept, "Do I understand this?" and "Can I use this idea (without looking at practice examples at the same time) ?" Answer honestly. If you answer 'No', then continue working and studying until you can answer "Yes".

iii) Spend two hours per day, five days a week seriously doing homework. Invent your own if the professor did not give enough, or find HW on the innumerable on-line sources. Spend at least one of these two hours WITHOUT consulting the web for answers to any questions.

iv) Attend class.

v) Attend section

vi) Study with a friend or a group. Talk about problems.

vii) Get yourself a Schaum's Outline of College Algebra. Go through all the problems.

ix) Get yourself a Schaum's Outline of Calculus. Go through all the problems covering the material of our class.
