Overview

Increased adoption of high performance servers coupled with applications using higher bandwidth is accelerating the need for dense 40 and 100 Gigabit Ethernet switching in both leaf and spine tiers of modern networks. The Arista 7060X and 7260X Series are purpose built high performance, high density, fixed configuration, data center switches with wire speed layer 2 and layer 3 features, combined with advanced features for software defined cloud networking and emerging requirements. The Arista 7060X and 7260X are key components of the Arista portfolio of data center switches delivering a rich choice of interface speed and density allowing customers to seamlessly evolve from existing 10GbE and 40GbE to 25GbE, 50GbE and 100GbE.

The 7060CX2-32S, 7060CX-32S and 7260CX-64 support a flexible combination of speeds including 10G, 25G, 40G and 100G in compact form factors that allows customers to design networks to accommodate the myriad different applications and east-west traffic patterns found in modern data centers whilst providing investment protection.

The 7260QX Series are purpose built high density and low power 40GbE systems that enable cost effective solutions with flexible and scalable resources for layer 2 and layer 3 designs.

Combined with Arista EOS both the 7060X and 7260X Series deliver advanced features for cloud, big data, virtualized and traditional data centers.

Product Highlights

Performance

- 7060CX2-32S: 32 x QSFP100 and 2x SFP+
- 7060CX-32S: 32 x QSFP100 and 2x SFP+
- 7260CX-64: 64 x QSFP100 and 2 x SFP+
- 7260QX-64: 64 x QSFP+ and 2x SFP+
- Flexible 40GbE and 100GbE support
- Quad 10GbE or 25GbE mode support
- Up to 12.8 terabits per second
- Up to 9.5 billion packets per second
- Wire speed L2 and L3 forwarding
- Latency from 450ns in 7060CX2-32S & 7060CX-32S

Data Center Optimized Design

- 32 QSFP100 ports in 1RU with typical power of under 7W per port
- Over 93% efficient power supplies
- 1+1 redundant & hot-swappable power
- N+1 redundant & hot-swappable fans
- Front-to-rear or rear-to-front cooling
- Tool less rails for simple installation

Cloud Networking Ready

- VXLAN and VM Tracer
- OpenFlow, DirectFlow and eAPI
- 136K MAC entries
- 128K IPv4 Routes
- 104K IPv4 Host Routes
- Up to 64MB Dynamic Buffer Allocation

Resilient Control Plane

- High Performance x86 CPU
- 4GB DRAM
- User applications can run in a VM

Advanced Provisioning & Monitoring

- CloudVision
- Zero Touch Provisioning (ZTP)
- LANZ for microburst detection
- DANZ Advanced Mirroring for visibility
- sFlow
- Self-configure and recover from USB

Arista Extensible Operating System

- Single binary image for all products
- Fine-grained truly modular network OS
- Stateful Fault Containment (SFC)
- Stateful Fault Repair (SFR)
- Full Access to Linux shell and tools
- Extensible platform - bash, python, C++

Arista EOS

The Arista 7060X and 7260X run the same Arista EOS software as all Arista products, simplifying network administration. Arista EOS is a modular switch operating system with a unique state sharing architecture that cleanly separates switch state from protocol processing and application logic. Built on top of a standard Linux kernel, all EOS processes run in their own protected memory space and exchange state through an in-memory database. This multi-process state sharing architecture provides the foundation for in-service-software updates and self-healing resiliency.

With Arista EOS, advanced monitoring and automation capabilities such as Zero Touch Provisioning, VMTracer and Linux based tools can be run natively on the switch with the powerful x86 CPU subsystem.
Model Overview

The Arista 7260X and 7060X come in four different configurations. Each delivers high performance combined with feature rich layer 2 and layer 3 forwarding, suited for both top of rack leaf, or fixed configuration spines.

The **7260CX-64** is a 2RU system with 64 QSFP100 ports offering wire speed performance with an overall throughput of up to 12.8 Tbps, combined with latency of under 1500ns and 64MB of buffer that is shared between groups of interfaces. Each QSFP port supports a choice of 5 speeds with flexible configuration between 100GbE, 40GbE, 4x10GbE, 4x25GbE or 2x50GbE modes for up to 256 ports of 10GbE or 25GbE, and 128x 50GbE. All ports can operate in any supported mode without limitation, allowing easy transitions and maximum flexibility.

![Arista 7260CX-64: 64x 100GbE QSFP100 ports, 2 SFP+ ports](image)

The **7060CX2-32S** and **7060CX-32S** deliver 32 QSFP100 ports in a 1RU system with an overall throughput of 6.4Tbps. All ports allow for a choice of 5 speeds including 100GbE, 40GbE, 4x10GbE, 4x25GbE or 2x 50GbE with a wide choice of QSFP transceivers and cables. All QSFP ports can operate in any mode without limitation enabling a wide choice of combinations for both top of rack and spine deployment. Arista 7060CX-32S supports latency as low as 450ns in cut-through mode, and a 16 MB shared packet buffer pool that is allocated dynamically to ports that are congested. Arista 7060CX2-32S introduces support for IEEE 25GbE and supports a larger shared packet buffer pool of 22 MB with the same low latency of 450ns.

![Arista 7060CX2-32S & Arista 7060CX-32S: 32 x 100GbE QSFP100 ports, 2 SFP+ ports](image)

The **7260QX-64** is a 2RU system with 64 fixed ports of 40GbE QSFP+ in a power efficient system with overall throughput of 5.12Tbps and up to 3.3Bpps of forwarding at both layer 2 and layer 3.

![Arista 7260QX-64: 64 x 40GbE QSFP+ ports, 2 SFP+ ports](image)

The Arista 7260QX switches offer low latency from 550ns in cut-through mode, and a shared 16 MB packet buffer pool that is allocated dynamically to ports that are congested. Consistent features to the 7060CX and 7260CX combined with low power and high 40GbE density means the 7260QX is optimized for 40GbE top of rack and spine tiers, high density storage and financial trading systems. All members of the 7060X and 7260X Series provide 2 SFP+ ports that enhance the 40GbE and 100GbE capacity and allow direct 10GbE and 1GbE connections using a comprehensive range of transceivers and cables.
High Availability

The Arista 7260X and 7060X series switches were designed for high availability from both a software and hardware perspective. Key high availability features include:
- 1+1 hot-swappable power supplies and four N+1 hot-swap fans
- Color coded PSUs and fans
- Live software patching
- Self healing software with Stateful Fault Repair (SFR)
- Smart System Upgrade (SSU) and Accelerated Software Update (ASU)
- Up to 64 10/25/40/50/100GbE ports per link aggregation group
- Multi-chassis LAG for active/active L2 multi-pathing
- 128-way ECMP routing for load balancing and redundancy

Dynamic Buffer Allocation

In cut-through mode, the Arista 7060X and 7260X switches forward packets with a latency of 450 nanoseconds to 550 nanoseconds. Upon congestion, the packets are buffered in shared packet memory that has a total size of 16 MBytes to 22 MBytes per port group. Unlike other architectures that have fixed per-port packet memory, the 7060X and 7260X Series use Dynamic Buffer Allocation (DBA) to allocate packet memory to a single port for lossless forwarding.

Scaling Data Center Performance

The Arista 7060X and 7260X series deliver line rate switching at layer 2 and layer 3 to enable faster and simpler network designs for data centers that dramatically lowers the network capital and operational expenses. When used in conjunction with the Arista 7000 series of fixed and modular switches it allows networks to scale to over 27,000 10G/25G servers in low-latency two-tier networks that provide predictable and consistent application performance. The flexibility of the L2 and L3 multi-path design options combined with support for open standards provides architectural flexibility, scalability and network wide virtualization. Arista EOS advanced features provide control and visibility with single point of management.

Arista Fixed System Leaf-Spine Designs Scale to 6,144 10GbE/25GbE ports or 1,536 40GbE/100GbE port at 3:1

Arista Modular System Leaf-Spine Designs Scale to 9,216 40GbE/100GbE ports or 27,648 10GbE/25GbE ports at 3:1 subscription

Arista Leaf-Spine Two-tier Network Architecture with 7060X and 7260X Series
Maximum Flexibility for Scale Out Network Designs

Scale out network designs enable solutions to start small and evolve over time. A simple two-way design can grow as far as 64-way without significant changes to the architecture. The Arista 7060X and 7260X include enhancements for flexible scale-out designs:

- 128-way ECMP and 64-way MLAG to provide scalable designs and balance traffic evenly across large scale 2-tier leaf-spine designs
- Custom hash algorithms for efficient hashing, persistent hashing and custom lookups for tunneled protocols
- Flexible allocation of L2 and L3 forwarding table resources for more design choice
- Wide choice of dense 10G/25G/40G/100G interfaces for multi-speed flexibility
- VXLAN routing, bridging and gateway capability for physical to virtualization communication in next generation data center designs
- DANZ, sFlow and multi-port mirroring to detect micro-burst congestion and provide network wide visibility and monitoring

Software Driven Cloud Networking

Arista Software Driven Cloud Networking (SDCN), combines the principles that have made cloud computing the unstoppable force that it is: automation, self service provisioning, and linear scaling of both performance and economics coupled with the trend in Software Defined Networking that delivers: network virtualization, custom programmability, simplified architectures, and lower capital expenditure. This combination creates a best-in-class software foundation for maximizing the value of the network to both the enterprise and service provider data center. A new architecture for the most mission-critical location within the IT infrastructure that simplifies management and provisioning, speeds up service delivery, lowers costs and creates opportunities for competitive differentiation, while putting control and visibility back in the hands of the network and systems administrators.

Smart System Upgrade

Smart System Upgrade is a network application designed to address one of the most complicated and challenging tasks facing data center administrators - network infrastructure maintenance. Changes to the underlying network infrastructure can affect large numbers of devices and cause significant outages. SSU provides a fully customizable suite of features that tightly couples data center infrastructure to technology partners allowing for intelligent insertion and removal, programmable updates to software releases and open integration with application and infrastructure elements.

Advanced Event Management (AEM)

Simplifying the overall operations, AEM provides the tools to customize alerts and actions. AEM is a powerful and flexible set of tools to automate tasks and customize the behavior of EOS and the operation of the overall data center switching infrastructure. AEM allows operators to fully utilize the intelligence within EOS to respond to real-time events, automate routine tasks, and automate actions based on changing network conditions.

Enhanced Features for High Performance Networks

The Arista 7060X and 7260X deliver a suite of advanced traffic control and monitoring features to improve the agility of modern high performance environments, with solutions for data monitoring, and next-generation virtualization.

Precise Data Analysis

Arista Latency Analyzer (LANZ) is an integrated feature of EOS. LANZ provides precise real-time monitoring of micro-burst and congestion events before they impact applications, with the ability to identify the sources and capture affected traffic for analysis.

Virtualization

Supporting next-generation virtualized data centers requires tight integration with orchestration tools and emerging encapsulation technologies such as VXLAN. The 7060X & 7260X build on the valuable tools already provided by the Arista VM Tracer suite to integrate directly into encapsulated environments. Offering a wire-speed gateway between VXLAN and traditional L2/3 environments, they make integration of non-VXLAN aware devices including servers, firewalls and load-balancers seamless and provide the ability to leverage VXLAN as a standards based L2 extension technology for non-MPLS environments.

Unified Forwarding Table

Cloud network scalability is directly impacted by the size of a switches forwarding tables. In many systems a ‘one size fits all’ approach is adopted using discrete fixed size tables for each of the common types of forwarding entry. The Arista 7060X and 7260X leverage a common Unified Forwarding Table for the L2 MAC, L3 Routing, L3 Host and IP Multicast forwarding entries, which can be partitioned per entry type. The ideal size of each partition varies depending on the network deployment scenario. The flexibility of the UFT coupled with the range of pre-defined configuration profiles available on the 7060X and 7260X ensures optimal resource allocation for all network topologies and network virtualization technologies.
Layer 2 Features
- 802.1w Rapid Spanning Tree
- 802.1s Multiple Spanning Tree Protocol
- Rapid Per VLAN Spanning Tree (RPVST+)
- 4096 VLANs
- Q-in-Q
- 802.3ad Link Aggregation/LACP
  - 64 ports/channel
  - 64 groups per system
- Multi-Chassis Link Aggregation (MLAG)
  - 64 ports per MLAG
- Custom LAG Hashing
- Resilient LAG Hashing
- 802.1AB Link Layer Discovery Protocol
- 802.3x Flow Control
- Jumbo Frames (9216 Bytes)
- IGMP v1/v2/v3 snooping
- Storm Control

Layer 3 Features
- Routing Protocols: OSPF, OSPFv3, BGP, MP-BGP, IS-IS, and RIPv2
- 128-way Equal Cost Multipath Routing (ECMP)
- Resilient ECMP Routes
- VRF
- BFD
- Route Maps
- IGMP v2/v3
- PIM-SM / PIM-SSM
- Anycast RP (RFC 4610)
- VRRP
- Virtual ARP (VARP)
- Policy Based Routing (DirectFlow) ¹
- uRPF
- RAIL

Advanced Monitoring and Provisioning
- Zero Touch Provisioning (ZTP)
- Smart System Upgrade Leaf
- Latency Analyzer and Microburst Detection (LANZ)
  - Configurable Congestion Notification (CLI, Syslog)
  - Streaming Events (GPB Encoded)
  - Capture/Mirror of congested traffic
- Advanced Monitoring and Aggregation
  - Port Mirroring (4 active sessions)
  - L2/3/4 Filtering on Mirror Sessions
  - Port Channel source and destination
  - Mirror to CPU *
- Advanced Event Management suite (AEM)
  - CLI Scheduler
  - Event Manager
  - Event Monitor
  - Linux tools
  - Integrated packet capture/analysis with TCPDump
- RFC 3176 sFlow
- Restore & configure from USB
- Blue Beacon LED for system identification
- Software Defined Networking (SDN)
  - Openflow 1.0 ¹
  - Openflow 1.3 ¹
  - Arista DirectFlow ¹
  - eAPI
  - OpenStack Neutron Support
- IEEE 1588 PTP (Transparent Clock and Boundary Clock) *

Virtualization Support
- VXLAN Gateway (draft-mahalingam-dutt-dcops-vxlan-01)
- VXLAN Tunnel Endpoint
- VXLAN Routing
- VXLAN Bridging
- VM Tracer VMware Integration
  - VMware vSphere support
  - VM Auto Discovery
  - VM Adaptive Segmentation
  - VM Host View

Security Features
- IPv4 / IPv6 Ingress & Egress ACLs using L2, L3, L4 fields
- MAC ACLs
- ACL Drop Logging
- ACL Counters
- 802.1X
- Control Plane Protection (CPP)
- DHCP Relay / Snooping
- MAC Security
- TACACS+
- RADIUS

Quality of Service (QoS) Features
- Up to 8 queues per port
- 802.1p based classification
- DSCP based classification and remarking
- Explicit Congestion Notification (ECN) - 7060X only
- QoS interface trust (COS / DSCP)
- Strict priority queueing
- Weighted Round Robin (WRR) Scheduling
- Per-Priority Flow Control (PFC)
- Data Center Bridging Extensions (DCBX)
- 802.1Qaz Enhanced Transmissions Selection (ETS) *
- ACL based DSCP Marking
- ACL based Policing
- Per port MMU Configuration
- Policing/Shaping
- Rate limiting
- Audio Video Bridging (AVB) *

* Not currently supported in EOS

DCS-7060CX-32S# | Arista 7060X, 32x100GbE QSFP & 2xSFP+ switch, configurable fans and psu, 2 x C13-C14 cords
LIC-FIX-2-E | Enhanced L3 License for Arista Fixed switches, 40-132 port 10G (BGP, OSPF, ISIS, PIM, NAT) - 7060CX-32S
LIC-FIX-2-V | Virtualization license for Arista Fixed switches, 40-132 port 10G (VMTracer and VXLAN) - 7060CX-32S
LIC-FIX-2-Z | Monitoring & provisioning license for Arista Fixed switches, 40-132 port 10G (ZTP, LANZ, TapAgg, OpenFlow) - 7060CX-32S
LIC-FIX-3-E | Enhanced L3 License for Arista Fixed switches, 144-256 port 10G (BGP, OSPF, ISIS, PIM, NAT) - 7260QX-64
LIC-FIX-3-V | Virtualization license for Arista Fixed switches, 144-256 port 10G (VMTracer and VXLAN) - 7260QX-64
LIC-FIX-3-Z | Monitoring & provisioning license for Arista Fixed switches, 144-256 port 10G (ZTP, LANZ, TapAgg, OpenFlow) - 7260QX-64
LIC-FIX-4-E | Enhanced L3 License for Arista Fixed switches, 288-640 port 10G (BGP, OSPF, ISIS, PIM, NAT) - 7260QX-64
LIC-FIX-4-V | Virtualization license for Arista Fixed switches, 288-640 port 10G (VMTracer and VXLAN) - 7260QX-64
LIC-FIX-4-Z | Monitoring & provisioning license for Arista Fixed switches 288-640 port 10G (ZTP, LANZ, TapAgg, OpenFlow) - 7260QX-64

**Optional Components and Spares**

FAN-7002H-F | Spare fan module for Arista 7260CX-64 and 7320X switches (front-to-rear airflow)
FAN-7002H-R | Spare fan module for Arista 7260CX-64 switches (rear-to-front airflow)
FAN-7002-F | Spare fan module for Arista 7050X/7250X, 7260QX 2RU and 7300 switches (front-to-rear airflow)
FAN-7002-R | Spare fan module for Arista 7050X/7250X, 7260QX 2RU and 7300 switches (rear-to-front airflow)
FAN-7000-F | Spare fan module for Arista 7150, 7124SX(FX), 7050, 7060CX & 7048-A switches (front-to-rear airflow)
FAN-7000-R | Spare fan module for Arista 7150, 7124SX(FX), 7050, 7060CX & 7048-A switches (rear-to-front airflow)
PWR-500AC-F | Spare 500 Watt AC power supply for Arista 7050X, 7280 and 7060CX 1RU Switches (front-to-rear airflow)
PWR-500AC-R | Spare 500 Watt AC power supply for Arista 7050X, 7280 and 7060CX 1RU Switches (rear-to-front airflow)
PWR-500-DC-F | Spare 500 Watt DC power supply for Arista 7050X, 7280 and 7060CX 1RU Switches (front-to-rear airflow)
PWR-500-DC-R | Spare 500 Watt DC power supply for Arista 7050X, 7280 and 7060CX 1RU Switches (rear-to-front airflow)
PWR-745AC-F | Spare 750 Watt AC power supply for Arista 7060X Series Switches (front-to-rear airflow)
PWR-745AC-R | Spare 750 Watt AC power supply for Arista 7060X Series Switches (rear-to-front airflow)

Warranty
The Arista 7060X and 7260X switches comes with a one-year limited hardware warranty, which covers parts, repair, or replacement with a 10 business day turn-around after the unit is received.

Service and Support
Support services including next business day and 4-hour advance hardware replacement are available. For service depot locations, please see: http://www.arista.com/en/service
