Data center networks face changes with hardware and meeting the requirements of the software it hosts. Quanta Cloud Technology provides a series of Bare Metal Switches, the QCT BMS product line, that addresses these changes in the data center market. The QCT BMS product lines support speeds up to 100G speeds on their Ethernet Switches. To meet the requirements of high performance, high availability, fast scale out, low latency performance, and continuous serviceability in data center applications, the QCT BMS product line is the best choice.

BMC (Baseboard Management Controller) embedded on the server as the core of the Intelligent Platform Management Interface (IPMI) architecture can now be implemented in the Ethernet switch. In addition to providing health monitoring of the temperature, power status, and cooling fans; BMC also aids in the deployment and management of software and hardware peripherals.

QCT BMS T7032-IX7 supports 32 QSFP28 (10/25/40/50/100GbE speed) in a compact rack unit size. By leveraging merchant silicon chip, T7032-IX7 is a high performance high density Ethernet switch with advanced features such as smart table, dynamic load balancing, and VxLAN/RIOT support. T7032-IX7 provides programmable capability which allows for future changes such as telemetry & analysis or network overlays & associated metadata. With ONIE (Open Network Installation Environment) pre-loaded it could be used for multiple network operating system which supports ONIE installer to achieve agile installation and fast response for the changing demand.
