Product Overview

The Inventec D7032Q28B is a 100GbE spine switch suited for Datacenter applications as well as Enterprise and Service Provider network deployments. It is capable of line-rate L2/ L3 (3.2 Tbps) switching performance in a compact 1RU form factor. The D7032Q28B switch offers an option of either a 2.4GHz x86 Quad-Core or 1.5GHz PPC Quad-Core CPU and supports a total of 32 x 100GbE QSFP28 interfaces with a true PHY-less design. Redundancy features including high-availability features including hot-swappable (1+1) redundant PSUs and (N+1) fan trays are standard.

Support for Open Network Ecosystems

The Inventec D7032Q28B supports multiple Network Operating Systems (NOS) including: Inventec IN-OS, Cumulus® Linux®, and Pica8® PicOS®. The Inventec D7032Q28B is also OpenFlow and SDN enabled. Full ONIE support assures network operators that the Inventec D7032Q28B seamlessly integrates into today’s open network environments.

Feature-Richness, Performance, and Port Density

The Inventec D7032Q28B offers low cut-through mode latency, 16MB on-chip packet buffer memory, and dynamic buffer management. Dedicated unicast and multicast queues provide separate scheduling structures with support for applications such as IEEE 802.1Q, VxLAN, L2GRE, and NVGRE. Overall feature-richness, high-availability, performance, port-density, and line-rate switching capability make the D7032Q28B an excellent choice for next generation large and medium sized datacenters. This also makes the D7032Q28B well suited for use as a general purpose aggregation and core switch in Enterprise and Service Provider networks.

Product Highlights

**Performance**
- 2976M Packets per Second
- 6.4 Terabits per Second Throughput
- Line Rate L2/L3 Forwarding
- 16MB Packet Buffer
- 32x100G QSFP28

**Scalability**
- 136K MAC Entries (HW Capable)
- 128K IPv4 Host Routes
- 72K IPv4 Routes
- 36K IPv6 Routes
- 64K Mroutes
- 32K IPv6 Mroutes
- 4K VLANs

**Control Plane**
- CPU Options
  - 2.4 GHz x86 Quad-Core
  - 1.5 GHz PPC Quad-Core
- 2x4GB DDR3 DIMM
- 2x512MB SPI Boot Flash

**High Availability**
- 1 + 1 Hot-Swappable & Redundant Power Supply
- 2 x SPI Flash Supports Boot Recovery
- 3 + 1 Hot-Swappable & Redundant Fans
- 802.3ad Link Aggregation/LACP
  - 256 Ports/Channel
  - 1024 Groups per System

**Flexible Storage**
- 1 x USB Port for External Storage

**Programmability and Software Support**
- Inventec IN-OS, Cumulus® Linux® and Pica8® PicOS®
- ONIE
- Open Source Software Provided as RPM
- Chef and Puppet Client Integration
- Bash Shell

*Estimates based on hardware specifications.
**Specification pending verification.
Product Highlights (Continued)

Layer 2
- Dynamic ARP
- Jumbo Ethernet Frames (up to 9416 bytes)
- Storm Control
  - Broadcast, Unknown
  - Unicast/Multicast
- STP
  - Rapid Spanning Tree (802.1w)
  - Multiple Spanning Tree (802.1s)
- VLAN
  - IEEE 802.1Q tagged based
  - Q in Q VLAN (802.1ad)
  - Private VLAN
- LLDP (802.1AB)
- Link Aggregation
  - 802.3ad with LACP
  - Virtual Port Channel
- Snooping
  - IGMP v1/v2/v3, DHCP, DHCPv6, MLDv1/v2

QoS
- 802.1p, IP Precedence and DSCP Based Classifications
- Differentiated Services
- Rate limiting
- Strict Priority Queueing
- Traffic Shaping
- Up to 20 Queues per Port
- WRED

Network Management and Monitoring
- CLI
- Telnet/SSH
- TFTP/Xmodem/FTP
- IPv6 Management
- Port Mirroring
- sFlow

Layer 3
- Address Resolution Protocol (ARP)
- IGMP v2/v3
- Internet Control Message Protocol (ICMP v4/v6)
- IPv6 (ICMP, OSPF v3, BGP, MLD)
- Open Shortest Path First (OSPF v2/v3)
- PIM-SM, PIM-SSM, PIM-BIDR, PIM-DM
- Policy Based Routing
- Static route
- Virtual Router Redundancy Protocol (VRRP)
- Border Gateway Protocol (BGP), Multiprotocol Extensions for BGP-4 (MP-BGP)
- Equal Cost Multipath (ECMP) (xx-way)

Security
- AAA (Accounting and Authorization)
- ACL Logging and Mirroring
- DHCP Snooping
- DOS Protection
- Ingress/Egress L2/L3/L4 ACL
- IP Source Guard
- Management IP Filtering (SNMP/ Telnet / SSH)
- Port MAC Locking
- Protected Ports
- Static MAC Filtering
- RADIUS
- TACACS+

Datacenter
- Priority-based Flow control (802.1Qbb)
- Enhanced Transmission Selection (802.1Qaz)
- Data Center Bridging Protocol (802.1Qaz)
- Quantized Congestion Notification (802.1Qau)
- L2 in L3 Tunneling (VxLAN/L2GRE/NVGRE)
- OpenFlow Switch Specification 1.0
