Product overview

The HPE Altoline 6921 Switch Series are top-of-rack (TOR) or spine switches for high-performance data centers. In a compact 1RU form factor, these switches provide line-rate L2 and L3 switching across up to 48 1/10GBASE-T or 1/10 GbE SFP+ ports, with 6 x 40GbE QSFP+ uplink connections.

The HPE Altoline 6921 Switch Series can be deployed as a TOR switch supporting 10GbE server connections, or as a spine switch, supporting 10GbE interconnects.

The HPE Altoline 6921 Switch Series bare-metal switches loaded with the Open Network Install Environment (ONIE), which supports the installation of compatible independent switch OS offerings.

Features and benefits

Data center optimized

- **Flexible high port density**
  the HPE Altoline 6921 Switch Series enables scaling of the server edge with 10GbE copper or fiber server connection, with 40GbE uplinks, to new heights with high density delivered in a 1RU design.

HPE Altoline 6921 Switch Series

Configuration

• **High-performance switching**
cut-through and nonblocking architecture delivers low latency (600 - 720 nanosecond for 40GbE) for very demanding enterprise applications; the switch delivers high-performance switching capacity and wire-speed packet forwarding

• **Hot/cold aisle support**
Models available with front-to-back (port-to-power) or back-to-front (power-to-port) airflow

• **Redundant fans and power supplies**
1+1 internal redundant and hot-pluggable power supplies and N+1 redundant fan trays enhance reliability and availability

• **VXLAN hardware support**
supports VXLAN L2 & L3 VTEP overlay technologies

Manageability

• **Out-of-band interface**
isolates management traffic from user data plane traffic for complete isolation and total reachability, no matter what happens in the data plane

• **ONIE bootloader**
switch is loaded with Open Network Install Environment (ONIE) software installer

• **Intel x86 CPU**
Provides high performance support of widely available, industry standard software and utilities

Layer 2 switching

• **VLAN support**
provides support for 4,096 VLAN IDs

Additional information

• **Low power consumption**
typical operation uses just 267W of AC power

Warranty and support

• **1-year Warranty**
